Good Turnout At Celebration

Champion fully maintained her reputation as an entertainer on Friday in the hands of the Elks, when a crowd of over five hundred attended the annual celebration. The presence of the Vulcan Band was one of the outstanding factors in what proved a very successful afternoon, as the music provided was highly entertaining.

Barons and Champion juniors met in the first baseball, the contest providing a thrilling exhibition, ending in a 8-1 decision in favor of Champion. Stavely and Johnson were the points for Barons while Cole and McCullough were the Champion battery.

Stavely and McGregor Lake also furnished the crowd with good entertainment, the former winning by the score of 7-4. Batteries: Stavely, Rae, Oviatt and Schlosser; McGregor Lake, Plunkett, Ferguson and Matlock.

Two softball games were played, the Vulcan team defeating Archie's Damsels, and the Champion girls' team winning from Vulcan. These games were well contested and added to the general enjoyment.

A complete program of athletic sports was run off, the different events bringing a number of entries and providing keen contests which were fully appreciated by the spectators.

The horseshoe tournament attracted an unusual number of entries, and devotees of that pastime certainly enjoyed themselves. Joening and Soriano were the first in the double contest, while Joening and Hummon tied for the most ringers in pitching fifteen times. In the play off Joening won.

Three Champion teams, Baker, McLeod, Snyder-Hummon, McLean-Watt tied in the second competition splitting the prize money. Joening won high points in the single pitching shoe contest with 67 points and 14 ringers.

Bert Taylor of Carmangay was a clown and his exhibition was generally applauded.

The final baseball game between Stavely and Champion was the evening attraction on the grounds when Stavely had a complete reversal of the form displayed in the afternoon, and were beaten by a score of 15-11. The batteries were: for Stavely, Rae and Oviatt, Schlosser and Nelson; for Champion, Watts, McLaren and Walker.

Elmer unpiled all three games with evident satisfaction to everyone concerned, in fact this feature was noteworthy in the promptness of the appearance of the teams when "play ball" was called, and the lack of disputes.

The crowd, including many from Carmangay, Stavely, Vulcan and the Yetwood and Reid Hill districts was certainly a fine one considering circumstances.

The Elks are to be congratulated on the manner in which all phases of the program were run off, and the efficient management in evidence throughout.

The dance in the evening taxed the capacity of the community hall to the utmost, Len Davis and his orchestra providing excellent music for the occasion. A picture show in Campbell's hall also provided an evening that was well patronized.

Miss Mary Cook of Gleichen will succeed Miss McFall as teacher of Grades IV, V and VI when school opens in the fall.

NOTES AND COMMENT.

Spring is here again, the troubled waters of unemployment by spreading its work out among more men working less time, the Standard Oil Company makes economic history. A five-day week of 40 hours creates a five-day week, each working out in one-eleven less pay for everyone getting over \$100 a month. Those getting under this are unaffected. Many men will be called back to work and a big group of men who have been laid off all communities. With two days a week for recreation, the thousands of Standard Oil workers will probably get right into their automobiles and use up a lot of Standard Oil gasoline, creating a nice economic set-up. The employer, giving more work to more men, finds more of the pay he gives coming directly back to him in company sales. With more business he can hire more men and so the circle expands.

Britain watches the Commons debate by 301 to 71 the intense campaign waged to drop the new added tax of a penny on each bottle of beer. The Exchequer Chamberlain replies that the Government can't do without the £10,000,000 revenue involved. A Labor member points out a new kind of abstinence is being growing in working families—the fathers are becoming heavier drinkers of beer and the babies are becoming lighter drinkers of milk.

Germany sees the Government use its dictatorial powers against the federal states for the first time. According to Faschist demands, President von Hindenburg orders Bavaria and other reluctant states not to interfere with the wearing of the Brown shirt uniform of the Hitler Guard. The states protest, even murmuring that they may secede, on the ground that the Reich Government has no right thus to override them. With the mass of all Germans in the Hitler Guard, there appears to remain no question of the powerful pro-Faschist trend in German affairs. Not until now has the will of Adolf Hitler been able to express itself forcibly through a presidential decree.

Soviet Russia finds that swiftly changing decrees makes hard sledding for a steady church-going people. Very few new orders from Moscow permitted farmers to retain a few domestic animals and to retain and trade a certain surplus of their crops. But village officials still seize the domestic animals and tax private trading as a means of resistance. The resulting confusion and unhappiness are traceable to men working from different points of view. The minor officials, holding to the perfection of the original Communist ideal, will not let up until the heart of the regime, learning through sober experience, institute many changes in order to retain something of a Communist ideal to which they can hold.

A professor of astronomy comes forward to point out that, contrary to popular belief, the longest day in the year is not the summer solstice, but the date in the grown-up calendar; but for the younger generation the longest day is the year will continue to be December 24.

A house made entirely of glass has been constructed in Glasgow, and it is probable that the local real estate agents take every precaution not to mention the house as a stone's throw from the station.

Another man who has a path beaten to his door is the obliging fellow who never refuses to lend his garden implements to his neighbors.

Before stamps were used, postage was paid on receipt of a letter. Imagine having to pay a bill for postage in order to get a bill!

Good Progress Being Made In Extraction Of Radium From Great Bear Lake Pitchblende

Investigation into the treatment of the Great Bear Lake pitchblende ore has been being conducted by the Ore Division of the Mines Branch, Department of Mines, Ottawa, under Mr. W. B. Timm, Chief of the Division. It is learned that progress is very satisfactory, and results are midway. It has been made considering the nature of the investigation and the small staff available for the work.

After preliminary investigation of all the known processes, Mr. Timm started a small laboratory at the refinery and March to one which seemed to be the most adaptable to the treatment of this particular ore. Now, the investigation has progressed from small laboratory scale work to pilot-plant scale, and the first trial run has given encouraging results. The pilot-plant scale on which work is being conducted is approximately one-tenth the size of an ordinary commercial unit, calculated to give all the data with respect to operation and costs.

Extractions of radium from the ore have been over 90 per cent, the last test made giving 97.98 per cent. This, however, is on one type of ore and the process, entirely chemical, one other type may require variations in treatment and may not give such good results. No results, therefore, can be released for publication until all types of ore from the project have been thoroughly tested and a suitable treatment worked out which can be embodied in a commercial treatment plant.

For some years only high grade pitchblende will be shipped from the Great Bear Lake property, i.e., ore containing about 40 per cent radium. The low grade ore will, no doubt, be concentrated at the mine to shipping grade, and the treatment plant will be erected in the most favorable position from the standpoint of cost of shipping. As it takes three tons of ore to the ton of radium, the advantage of shipping the ore to the supply of chemicals will be readily seen.

Let there be any misunderstanding as to the reason why the word concentration when spoken of in the treatment of pitchblende ore for the extraction of radium, should be pointed out that the concentration of the radium is relative to the concentration of the pitchblende in the ore. The latter will, no doubt, be done at the mine when it becomes necessary to carry out this operation. The concentration of the radium is that part of the charge which is present when the radium in solution is precipitated with barium, resulting in a calcium-barium sulphate concentrate.

Those unacquainted with the topography and general characteristics of the Great Bear Lake region, will be interested to know that the lake itself is the largest one contained entirely within Canadian boundaries, and the fourth largest of the North American continent. Its area, according to present surveys, is 11,512 square miles for Lake Superior, 23,010 for Lake Huron, 22,400 for Lake Michigan, and 11,170 for Great Slave Lake. Its greatest length is 190 miles, and its width 116 miles. Its elevation has not yet been accurately measured, but it is approximately 360 feet above mean sea level. Its depth varies up to 75 fathoms, or 450 feet, placing its floor below sea level.

Great Bear Lake has long been known through the descriptions left by early explorers, particularly Franklin, Dease and Simpson, who made this lake their headquarters in the Arctic Coast, but it is only recently that the area surrounding it has become of economic importance. In 1920, oil was discovered on the MacKenzie River in the vicinity of Norman, where Great Bear River discharges the waters of the lake. The

discovery well, and subsequent wells drilled in 1921 and 1922, were capped and left for development when conditions were not favorable. Recently, the oil has produced, experimentally, a high grade gasoline. In 1923, oil crops of coal were reported to exist at Douglas Bay on Great Bear Lake. From 1926 to 1928, biologists of the Northwest Territories conducted investigations over a large part of the Northwest Territories in search of grazing lands for reindeer. One of the areas found to be most suitable for the purpose lies immediately north of Great Bear Lake.

New Source Of Rayers

Discovery Regarding Waste From Sugar Cane Is Important

Sugar cane waste has been turned into a new source of rayon—a silky dress material for women. Chemists have succeeded in developing a process by which high-grade cellulose is obtained from sugar cane, produced from bagasse, the waste from sugar cane. After the sugar has been extracted. The discovery is regarded as important as an American manufacturer has developed a special type of cellulose sugar cane mill section between 250,000 and 500,000 tons of bagasse annually. Much of this material has been used in manufacturing insulating building material. Other quantities have been used as fuel for the mills.

New Industry In Alberta

Factory Turns Out Potato Chips and Potato Wafers

A new industry has been launched in Lethbridge, Alberta, the output of which will be potato chips and potato wafers. The latest models in machinery for this type of production are that large quantities of local grown potatoes will find a market. The ultimate care is taken in handling the potato chips which will be retailed in attractive, dust-proof containers. If the Lethbridge product proves popular the factory and its products will be expanded.

Potato chips are a popular and nutritive food product in the States where similar factories have been established.

Floral Barometer Is Unique

One In Victoria Park, London, Ontario Is Accurate Under Test

A floral barometer has been laid out in Victoria Park, London, Ont., and under test it worked. It is the first of its kind to be installed in Canada. It records accurately each day the barometric pressure and forecasts change in weather. It has two front hands, one stationary, and the other moving. The words "stormy," "rain," "change," "fair," "dry," are the outer edge in contrasting colored plates. The pressure numbers from 26 to 31, the pressure range, is shown in floral design.

"YES, I AM 40 YEARS OLD!"

says Irene Rich

"YES, I am 40 years old," says Irene Rich, 40, of two grown daughters of whom I am very fond. A screen star never worries about birthdays, but in Hollywood, they guard complexion beauty above all else. They know how says youth quenches any-thing else.

How does this lovely star guard complexion beauty? Just as so many other Hollywood stars do—by using Lux Toilet Soap regularly for years. She says "I have been very grateful for it."

Surly you will want to try this fragrant, white soap. The cans of double-ease French soap for 10¢.

IRENE RICH and her two daughters (left to right) Franca, twenty-nine, Jean, (in background), fifteen, and Jean's mother, Irene Rich, in her recent photographs.

THE HOUSE OF DREAMS-COME-TRUE

BY —

MARGARET PEDLER
Author of
"The Spendthrift," "The Hermit of Far East,"
Holder & Stoughton, Ltd., London.

CHAPTER XXIV.—Continued.

Once more the curtain had risen and the audience, contented and deeply relaxed, the lights flashed up into being again over the auditorium. Simultaneously the door of Lady Anne's box was opened from the corridor outside.

"What's come in?" said a voice—pleasant voice with a gay inflection of laughter running through it as though its owner were quite sure of his welcome—and Burke, bald and striking-looking in his immaculate evening suit, his curly hair flambéed wittily under the electric lights, strode into the box.

He shook hands all round, his glance slightly quizzical as it met Jean's, and then Lady Anne presented him to the Comtesse de Varginy.

It almost seemed as though some of the same mutual friendliness, spirit, flamed from the two southern-dark eyes to the fiery red-brown ones, and when a minute or two later, Burke established him self in the seat next to Jean, vacated by Nick, he was in a new mood.

"Where did you find that Eastern-looking charmer? I feel convinced I could lose my heart to her without any effort."

Jean could hardly refrain from smiling. This was her first meeting with Burke, and the occasion of the session, which had occurred in the little parlour at the "honeymooners' inn," and now he met roguish assurance as though nothing in the world, other than a mutually pleasing and amicable nature, had taken him to the hotel, so far from Burke, she reflected helplessly.

"Then you had better go and make love to her," she suggested. "There happens to be a husband in the background—a little hycconhond with quite charming manners—but I don't suppose you would consider that any obstacle."

"None," retorted Burke placidly. "I'm quite certain she can't be in love with him. Her taste would be more robust, I should say. When I stop off at Claridge's. We met her there

this evening. I knew her in Switzerland."

"Well, you shall all come out to supper with me tomorrow—unless the Countess included."

Jean shook her head demurely.

"We shall all be back at Staple tomorrow—the Countess excepted. You take care."

"Then the supper must be tonight," replied Burke serenely.

"What are you doing in town, anyway?" asked Jean. "I Judith with you?"

"No. Came up to see my tailor—ironically."

He crossed the box to arrange matters with Lady Anne, and before the curtain closed, he had the act it was agreed that they should all have supper together after the play.

Later, when Burke had once more resumed his seat next to Jean, Madame de Varginy, whose hearing, like her other senses, was preternaturally acute, caught a whispered plaid breached into Nick's ear by Lady Anne.

"Now isn't that provoking. Nick darling? Why on earth need Geoffrey Burke be here?"

"I was hoping, later on, that I and I were very discreet and effaced ourselves—that Blaise and Jean might settle things."

Madame de Varginy's eyes remained fixed upon the stage. There was no sign in their expression to indicate that Lady Anne's plaintive murmur had at that moment supplied her with the key of the whole situation as it lay between Jean and the two men who were sitting one each side of her.

But the following evening, when the Staple party had left town, she and Burke were dining alone together at a little restaurant in St. Jean, the knowledge she had gleaned bore fruit.

Burke never quite knew what impulses it was that had prompted him, as he made his farewells after the supper-party, to murmur in Madame de Varginy's ear: "One more night tomorrow night!" It was as though the dark mysterious eyes had spoken to him, compelling him to some sort of friendly overture which the shortness of his acquaintance with the woman, and the lack of means of making a definite proposal, had rendered difficult.

It was not until the coffee and cigarette stage of the little dinner had been reached that Madame de Varginy suddenly shot her dart.

"So you come all the way up from that place Coonie—Coonie? Ed?"

"I am—Miles Peterson and, hey, presto! You vanish the next morning!"

Burke stared at her almost rudely. The woman's perspicacity annoyed him, and he said:

"I came up to see my tailor," he replied curtly.

"Mais parfaitement!" she laughed low, melodious laughter, tinged with a touch of coquetry, which made Burke's annoyance at her almost summing up of the situation. "To see your tailor. Naturallement!" But you were not sorry to encounter Miles Peterson also, hein? You enjoyed her?

Burke's eyes gleamed at her.

"Do you think a dog enjoys looking at the bone that's out of reach?" he said bluntly.

"And is Miles Peterson then, out of reach? Me, I do not know?"

Burke was moved to sudden concern.

"She might not be, but that there is another man—"

"Yes, you think him?"

"We'll—! with a long-drawn-infection compact of gentle irony, "you should be able to win against this Monsieur Tor-ma-rin. I think" regarding him. "I think that you will."

Burke shook his head glibly.

"He had first innings. He met her abroad somewhere—rescued her in the snow or something. That resuming stent always pays with a woman. All I did was with a short, harsh laugh—nearly to break her neck for her out driving with me one day recently."

"Is she engaged to Monsieur Tor-marin?" asked Madame de Varginy quizzically.

"No. Luckily, there's some oil afar in the past holds him back."

She nodded.

"You shall marry her," she de-

clared with conviction. "See, Madame de Varginy—'s, she, said most."

"I am 'clairvoyante, prophèteuse,' and I tell you that you will marry this little brown Jean."

Her foreign accent strengthened with her increasing emphasis.

Burke was dubious.

"I am afraid you clairvoyance will fail this journey, madame. She'll probably marry Tor-marin—unless—his eyes glinting—"I carry her off by force."

Madame de Varginy shook her head emphatically.

"But not I do not see it like that. 'Eh bien!' if she becomes fiancee—engaged to him—you shall come to me, and I will tell you how to make sure that she does not marry him."

"Tell me now!"

"Non, non! Wait her own way. Only if you do not succeed, if Monsieur Tor-marin wins her—why, then, come to visit me at Chateau Varigny."

That night a letter written in the Comtesse de Varginy's flowing formal handwriting sped its way to France.

"Partiers work towards completeness," it ran. "My visit here has chanced 'bien a propos.' There is another would-be lover besides Blaise Tor-marin. I have urged him on to win her if he can, for if I have not wronged him, Mademoiselle Tor-marin is a woman of the type to become deeply in love and less able to master his feelings if he realizes that he has a rival. At present he is refusing to do this for himself. An application of oil will probably drive him into a declaration very quickly. When the dog sees the bone about to be taken from him—he snaps! So I encourage this red-handed attack of mine. I am sure that he will—'caire du coeur' with vigour. If for Blaise Tor-marin becomes actually betrothed to Mademoiselle Peterson, it will make his punishment the more complete. I pray the God of Justice that it may not now be long delayed!"

(To be Continued.)

A Remarkable Cure

Crippled Girl—Arm and Leg—"Bobby"! By Noted Surgeon

After two years in hospital, complete cure is in sight for Pearl Penny, a pretty girl of 18, crippled for 13 years by infantile paralysis, which left her with twisted legs and a right arm which was so weak it was "rebuilt" by a noted surgeon.

Bones were taken from various parts of the body and used to reinforce and build up muscles twisted away from the bones of broken arms and legs.

Gradually her legs were made straight and shapely. Her right hand was practically useless but a long incision was made in the wrist and a muscle

separated the thumb and fingers. Incisions made in various parts of the body made 250 stitches necessary.

The patient can now stand on her feet unaided, and after her next operation it is hoped that she will be able to enjoy life like any other normal girl.

An Effective Device

Discharge of the Heart and Brain—Dr. Vinton T. Tamm

An attachment for an ordinary pistol by which a victim may be rendered unconscious without suffering permanent injury is being tested by the Paris police. A cone-shaped chamber containing a mixture which is exploded with blank cartridges. When a cartridge explodes it throws a blast of gas for a distance of about ten feet. Anybody inhaling this gas becomes unconscious and remains unconscious for an additional ten minutes after recovering consciousness. This weapon was invented by a Parisian named Professor H. H. H. Tamm. It is of great aid to the police in quelling riots, and claims that it will be a more effective tool for putting down disturbances than any of the devices now used by the authorities.

Old Portrait Found

Is Supposed to Be Picture of William Shakespeare

Assumed to be a portrait of William Shakespeare, and said by some experts to have been painted by Titian, Burckhardt has been found in a County Cork manor.

The portrait 10 by 12 inches, has been for generations in the same family. The owners thought it was a painting of Sir Walter Raleigh, but when it was pointed out that it was a portrait of Shakespeare's fellow actors, painted when Shakespeare was 38 years old. It is on an oak panel and in a good state of preservation.

In Saskatchewan, south of approximately latitude 53, enough food is produced to support a population of 40,000,000.

"I have found Dr. Fowler's Extract of Wild Strawberry to be the most effective remedy and keep it always handy and give it immediately at the first sign of 'Dr. Fowler's' I no longer dread the summer months."

"ROLL

YOUR

OWN" with..

Thousands of delighted smokers say it is the way to have proved it, time and time again. You can roll at least 50 cigarettes with a 20c. package of Turret Fine Cut cigarette tobacco. And every cigarette you roll will be to your liking. The more you roll, the more you'll enjoy them.

15¢ and 20¢ packages
—also in 3½ lb. vacuum tins

FREE Chantecler Cigarette Papers with every package.

TURRET
FINE CUT
Cigarette Tobacco

Sell Canadian Tobacco

Canadian Smoking Tobacco and Cigars Have Invaded England

There is a special interest in the following item which appears in the current issue of the "Economic Annals," official organ of the Agricultural Economics Branch of the Dominion Bureau of Statistics.

"Brands of smoking tobacco and cigarettes made wholly of Canadian grown tobacco were introduced in Great Britain during 1933 and have won a very fair measure of success. Canadian manufacturers were the first to offer a Canadian pipe tobacco and very recently a cigarette made entirely of Canadian bright leaf has been placed on the market."

However folks would aid you.

With courage and with hope. When the world has betrayed you, No friend, though great and clever, And constant as the sun, Can fight your battle for you; But when you fight alone!

No argument about it.

Though you may laugh or sob; Life, though you prize it not, Is just a one-man job.

Grants are Restricted

Alberta's Relief Assistance Scheme For Farmers Made Only

Married men only will be placed on farms at the present time under the Alberta government's relief settlement scheme, it is revealed in a statement made by Calgary officials. In making the grants, the government is restricted to married men, the statement declared each family would be allotted \$600 paid by government, provincial and municipal governments.

The grants will be paid in trust by the province and administered for each family's benefit. The money is used for sustenance and development only, the statement concluded, and must not be used for buying land or paying taxes or rentals.

Wireless for Shanghai

An agreement has been signed by the Chinese ministry of communications and the Canadian Marconi Company for the installation of a beam wireless station in the outskirts of Shanghai.

Wireless for Shanghai

Everyone knows how attacks of asthma often keep their victims awake the whole night. And when the attacks are frequent and不分 for a day or two, and yet, business must still be carried on, the result is that the lack of rest can be avoided by the prompt use of Dr. J. D. Kellogg's "Remedial" which positively drives away the attacks.

Freight Big Crop

The Lethbridge Herald says farmers are already putting the Alberta wheat crop this year at 150,000,000. It's a long way to August 20, when cutting is expected to commence, and many things may happen. However, if the yield outstrips the amount of grain available for storage, the price of wheat probably would be as bright as the yield prospects we would all be happy.

The cheapness of Mother Graves' Worm Exterminator puts it within reach of all, and it can be got at any druggist.

Not a Bad Definition

Robert Gill in his private newspaper which he publishes "for his own amusement and the entertainment of his friends" defines "Radio" thus:

"An expensive instrument you place in your home so some ass can talk to you about toothpaste."

Japan imports about 1,500,000 tons of rice every year.

A new oil refinery, costing \$25,000, is to be built at Saskatoon this year.

Little Helps For This Week

"It is God that giveth me with strength and maketh my way perfect."—Psalms xviii, 32.

Even as a nurse, whose child's impatience can hardly lead his foot from place to place.

Leave a kiss, kiss, sets him down to go, Nor does upbraid him for a step or two.

But when she finds that he begins to fall,

She holds him up and kisses him within.

So God from man sometimes withdraws His hands.

Awful to teach him infant to stand;

But when He sees his feeble strength begin

To fail, He gently takes him up again.

When the babe puts his little soft hand into yours, his hand is as strong as yours, it since is yours that guides it; so when we put our hand into God's, we are by His grace as strong as He is, since He leads and we only follow.—Henry Ward Beecher.

Great Bear Lake Mining Begins

Mining President K. E. Enness with the possibilities

Great blocks of silver, tons of pitchblende and copper at \$1.50 a dozen, are some of the things to greet a visitor to the Great Bear Lake region. Enness with the great mining possibilities in mind, has invited Dr. John Michaels, president of the Contact Lake Mining Company, returned by air to Edmonton recently. He was accompanied by Walter Hale, district police inspector.

Keep your stock free from blemish with Douglas' Egyptian Liniment. Removed inflammation quickly reducing bruising, stiffness of joints, and sore muscles.

The words "with my worldly goods I endow" have vanished from the American Methodist marriage service, following the example of the goods themselves.

A \$250,000 hotel is being built at Edmonton, Alberta.

WORLD HAPPENINGS
BRIEFLY TOLD

James W. Douglas, Edmonton, has been appointed stipendiary magistrate for the North-West Territories.

Lady Eaton of Toronto, back in Canada after an extended visit abroad, told an interviewer in Winnipeg that Canada is doing too much worrying about the depression.

New York motorists paid approximately \$3,000,000 during the past decade to run red lights, talk back to auto police, and drive in the wrong direction on one-way streets.

An issue of the Canada Gazette contains a proclamation designating the Waterton Lakes National Park as a part of the Waterton-Glacier International Peace Park.

Canadian salmon in the public ownership of railways. India is first with 41,734 miles of road. Germany second, with 32,400, and Canada, 24,822, including federal, provincial and municipal.

Canadian salmon eggs are being exchanged by the state of California by Dominion authorities for a corresponding number of steelhead salmon eggs to be used in stocking British Columbia waters.

One hundred years ago the Canadian extraction of eight or nine millions of the Jews of the country. Jews all over the Dominion celebrated the centenary of emancipation.

The British gunboat "Mooreh" was bombed by mistake by Chinese aeroplanes sent by General Chiang Kai-shek to capture the gunboats of munitions captured by Admiral Chan Chak, rebel commander of the Chinese navy, but she was not struck.

Union Drilling Company of Calgary will commence drilling for oil in the Badlands in the fall. It is believed when dinosaurs roamed millions of years ago. Vancouver capital is bidding the venture and W. D. Marler, of Vancouver, is heading the company seeking crude oil.

Twenty thousand graves at the Hudson Bay sawmill yards at Churchill, George McDonald, machinist, found an old coin of the reign of George the Third. The coin is thin, and somewhat worn. The gravel from which the coin was taken, came from the shore of the bay. It is presumed it was lost by a sailor of one of the early expeditions.

Salvaging Lost Gold

Divers Are Bringing Up Ingots From Sunken Liner

Brest, France. Thirty ingots of gold, valued at \$1,000,000, were salvaged away in the hold of the salvage ship "Artiglio II," as divers, with renewed vigor, dropped into the sea to fish for the sunken \$5,000,000 which sank down with the liner "Egypt" ten years ago.

The \$1,000,000 which was clumped down on the "Artiglio's" decks represents four years of dogged labor against the sunken liner's stony seas. Two stout ships have been lost in the quest and the lives of 15 seamen.

The tragedy of the past was mirrored in the dramatic scenes of the "Artiglio's" deck when the ingots were brought up. There was no moment of silence in honor of the divers who were killed two years ago in the explosion which destroyed the "Artiglio II."

Paris, France.—The French salvage company which recovered the sunken liner, the hull of the liner, the liner, "Egypt," from which \$1,000,000 has been recovered by the salvage ship "Artiglio II," will claim part of the booty, Captain Jean Davy said in an interview with Paris-Midi, Paris newspaper.

A firm of shipowners wired one of their captains: "Move heaven and earth; get her on Friday."

Just as they were becoming very anxious they got the reply: "Rushed her, and arrived Thursday."

Rope or cord can now be made weatherproof by a British process impregnating it with rubber.

A man in a suit and hat, holding a briefcase, looks at a world map spread out on a table. He is pointing at a specific location on the map.

"My brother lost his sight through drink."

"It serves me the other way—I see double."—Gutiérrez, Madrid.

More Prevalent In Cities

Crowded Centres

That common cold is associated with crowded cities has been suspected by public health officials who have long suspected Dr. Wilson G. Smillie of Harvard now supplies the supporting evidence. In four isolated communities colds are caught only once a year, while in Springfield, Mass., it is especially impressive. The reason is that most thoroughly community life and sleep in damp, hot barracks, work in drafts at temperatures below freezing, but catch no cold. When Dr. Smillie concludes that the common cold is a disease of crowded cities, infection and probably to one that can never be seen under the microscope we naturally ask if there is no serum that will impede immunity. He holds out no hope. Only the secondary infection, grippe, can be thus controlled.

The primary cold seems to be unconquerable—the price we pay for swarming in cities.

A Perpetual Memorial

Late John Weller Superintended Work On Welland Ship Canal

John Laing Weller is dead, but the Welland Ship Canal will be a perpetual monument to his memory. All that was familiar even with the name of the man who was in charge of the construction of the greatest public work ever completed in the Dominion of Canada. It was Mr. Weller who was on the job it was he who was head of the survey, designs and carrying out of the big task from 1912 to 1917. When work was resumed in 1919 after the war, it was Mr. Weller who was made consulting engineer. In the last few years he has been in pension from the Federal Government.

THE CHRONICLE, CHAMPION, ALBERTA

SUNDAY SCHOOL LESSON

JULY 10

THE CALL OF MOSES

Golden Text: "Certainly I will be with thee."—Exodus 3:12.

Lesson: Exodus 2:1 to 420.

Devotional Reading: Isaiah 6:1-8.

Explanations and Comments.

Called To a Great Task, Exodus 3:10—The biography of great men is not confined to public events. It relates the incidents which occur in their personal and domestic experience which are spiritual and account for spiritual results. This was it with Moses; we must be very like him in order to understand his conduct at the head of the host of Israel. How the Lord caused to Moses to become the leader of his people, deliver them from oppression in Egypt, and bring them to the Promised Land. He stood before a bush that burned and yet was not consumed.

"How clear is the anticipation here of what is now the accepted truth of God, though always expended in nature and in history, is never consumed in the experience of men."

"I have seen the affliction of my people . . . I am come down to afflict them . . . and I will send thee to Pharaoh, that thou mayest bring forth my people . . . with a staff in thy hand."

With a flash of insight Moses knew that God was calling him to his service. He was not surprised, for he was the beloved brother of Jacob in Egypt.

"The dialogue between Jacob and Moses is a remarkable one. It must be purified, not as one audible externally, as giving expression—in words which are not words—but in the mind—their meaning is not words but thoughts more than the words which the accents involve."

"The sum total of all these charges should be great enough to make the people of the United States bend every effort to reduce automobile hazard."

The remedy lies solely with the people themselves.—Argonaut, San Francisco.

What Price Accidents?

Burden Of Cost Falls On Just and Unjust alike

The average citizen when he picks up the paper and reads about an automobile accident may feel a fleeting moment of anger at the guilty man, but he dismisses the incident from his mind as something that does not concern him personally. If he stopped to think, he would realize that every automobile accident involving injury or loss of life affects his pocketbook. The cost of an accident calls for emergency hospitalization and this in turn costs money.

To this cost must be added the expense of ambulance, signals, court and legal expenses. Insurance rates are increasing. So that in the end we are one again the matter out the burden of such accidents falls upon the just and the unjust alike.

2,000,000 automobile accidents in the United States, with 1,000,000 people injured or killed. This is too appalling to even comment upon. The destruction of life and property in the end is the greatest hazard to society, much more than the cost which the accidents involve. The sum total of all these charges should be great enough to make the people of the United States bend every effort to reduce automobile hazard.

The remedy lies solely with the people themselves.—Argonaut, San Francisco.

Binder Twine Shipments

Eighteen Bales Ready to Be Handled Over Lake Superior

Binder twine to the amount of approximately \$0,000,000 worth will be handled over the docks of Fort William and Port Arthur ports this year to meet the requirements of western Canada, where grain fields are expected to produce one of the biggest crops in history.

Already twine by the thousands of bales is finding its way up the lakes to the twin ports to be unloaded and shipped by rail to scores of distribution agents throughout the three prairie provinces.

Twines that will be up Canada's 1932 crop is coming from the mills of the International Harvester company, the Ontario, Collingwood, Peterborough, and Dutch mills in Rotterdam. Much of it will be unloaded and shipped from the trans-ports of the first two cities, while the remainder will be sent through the C.P.R. and C.N.R. freight sheds, the whole operation providing employment for hundreds of stevedores during the summer months.

Would Share Profits

Alberta Urban Municipalities Want Portion of Taxes Levied by Province

Alberta urban municipalities believe they are entitled to a portion of the taxes levied by the province on the production, manufacture, sale and distribution of grain and grain products.

The experts were described by Dr. Otto Hahn, of the Cornell Bacteriology Department.

The yeast cells—each a tiny particle—were laid on a glass slide. In looking at them he said, "I have never seen such a mass of yeast cells in my life."

"God has a way of His own in which which He has made. He lays His will on us and we must submit to the realization that He stands surrounded by that being to specific conditions and definite service."

"And, as the path of duty is made plain."

May grace be given that I may walk not like the hireling for his selfish gain.

But to be in the light in the darkness, walking as one to pleasant service led. Doing God's will as if it were my own, Yet trusting not in me, but in His strength alone."

—Whittier.

Body Emits Violet Rays

Yeast Cells

A woman's eye killed yeast cells simply by looking at them at Cornell University recently. This discovery, suggesting a new way of fighting eye diseases, was made by Dr. Otto Hahn, of the Cornell Bacteriology Department.

FAIR SUCCESS ATTENDS LABORS AT LAUSANNE

Lausanne—Despite the pessimistic atmosphere of the past few days, the Lausanne Conference looks like achieving a measure of success in its gigantic task of solving the reparation and inter-governmental debts that has Europe on the verge of a crash.

"Although I am sorry to say I cannot report to you we have got a complete measure of agreement we have got it," said Mr. Ramsay MacDonald, the chairman, guardedly commented at a meeting of the six principal powers at the conference.

These are the points on which all the principal powers, including France and Germany have finally agreed.

(1) Adjustment of inter-governmental war debts and reparations should take place without delay in new disasters are to be avoided.

(2) Steps are necessary to ensure the stability of the German currency, something substantial and so far as possible, final, although it is recognized a final settlement has to be adapted to a world settlement which includes the United States.

(3) The conference must end soon, and the settlement must be such as will restore peaceful restoration of confidence.

(4) Artificial transfers disturbing the international balance of accounts should only take place if at all by the joint operation of international committees and should be limited to that capacity.

(5) Germany cannot pay at the present time.

Grasshopper Plague

Hope That Red Tick Would Abate
Unwarranted

Winnipeg, Manitoba—A tick that a tiny red tick, an attacker of grasshoppers, would eat Dominion and Manitoba agricultural departments in ridding the province's wheat belt of the worst grasshopper plague in 50 years died today. "There are no ticks," he said.

Norman Cawle, head of the federal government laboratory at Treebank, Man., said the little parasites attack adult grasshoppers and do "about as much damage to them as a dog does to a hen." If confined their activity to young hoppers they would be able to materially check the grasshopper advance, he said.

Government experts said the grasshopper outbreak in south Manitoba is the worst in the history of modern agriculture in western Canada, exceeded only by that which lasted from 1873 to 1875.

Heavy Penalty For Fraud

Fifteen Employees Of Stores In Moscow Sentenced To Death

Moscow, Russia—Fifteen employees of Moscow's state retail stores were sentenced to death after a six-day trial on charges of defrauding the state of 1,000,000 rubles (nominally \$50,000) by theft, illegal raising of prices and tax evasion.

Seventy others were sentenced to ten years in prison and eight were sent to jail for three to five years. Three other defendants were acquitted.

Printing Jobs Go Abroad

London, Ont.—Charging that \$500,000 worth of printing for Canadian firms was done outside Canada in 1931, the Ontario-Quebec Conference of Typographical Unions trained its guns against this alleged condition. The Canadian Manufacturers' Association and other employing organizations to condemn the practice. The printing for some companies was done in countries as far away as Sweden, it was claimed.

Will Keep Present System

Calgary, Alberta—Alberta wheat pool will continue operating this summer under its present marketing system. Pool officials decided not to hold a plebiscite this year among its members on alternate methods of marketing, the announcement said.

Presidential Election and Business

New York—A study of stock market averages compiled by Warren M. Persons, economist, goes a long way toward solving the people's speculative迷雾 in the United States because of the proverbial presidential year" has never been justified.

Free State Senate Passes Oath Measure

But Bill Almost Unrecognizable On Account Of Amendments

Dublin, Ireland.—The Free State seems to have Republican government's bill to amend the oath of allegiance to the crown, but the measure has been amended so the bill is almost unrecognizable. As it stands, the abolition of the oath came into effect in the constitution of the Free State.

"The government has no intention of accepting the measure in its present form," said Senator Joseph Connelly, a member of Post Office Telegraphs. It is the Free State that has passed the bill, not the Dail Eireann, "with the result that might be expected," he added.

This means the Dail may pass the original measure, which after all, would be in accordance with the will of the people in the general election in which the Republican Government would seek a concise mandate for abolition of the Nationalist Party.

Deportation Case

Appeal To Supreme Court Of Canada Is Delayed

Halifax, N.S.—An appeal to the supreme court of Canada on behalf of alleged Communists held here for deportation will be held up at least a week while Mr. Justice Ross, of the Nova Scotia Court of Appeal, considers the application for leave. When formal motion was made recently by the L. R. Ryan, counsel for a group of eight of the alleged Reds, C. E. Smith, K.C., representing the Nova Scotia brokerage companies, and O. E. Lennox, master architect at Osgoode Hall.

Rochester, who dealt with the brokerage firm for many years, represented the defense. The application for leave was denied and the court of appeal, in its order, continued the application for a week, and intimated that he might hear further argument from Mr. Ryan.

It is understood men sought release under habeas corpus proceedings, but their action was dismissed by a supreme court judge and later by the full bench of the Nova Scotia supreme court.

Under New Regime

Newfoundland Party Takes Over Reins Of Office

St. John's, Nfld.—The island dominion is now under control of the United Newfoundland party, with F. C. Alderice, prominent St. John's business man, as prime minister. Sir Richard Anderson Squires, unseated in the general elections of June 11, has resigned, and members of the new government were sworn in. Mr. Alderice also took the portfolio of Minister of Agriculture.

Other members of the executive council are: J. C. Puddister, Secretary of State; L. E. Emerson, K.C., Minister of Justice; H. A. Winter, K.C., James Ayre, Hon. F. McNamee, S. J. Foote, Harold Mitchell, John Stone.

Scalps Prove Fatal

Debate From Vancouver Attending Orange Gathering In Montreal

Dies From Injuries

Vancouver, B.C.—John Campbell, 45, of Vancouver, died in hospital today from injuries sustained when he was scalped in his hotel bathroom. He was believed to have been overcome by a seizure while drawing water for his bath and failed to stop the water. He was 75 years of age.

Mr. Campbell was in Montreal to attend proceedings of the grand lodge of British North America, of the Orange Order. Monday he was elected district grand master of the B.C. Knights. He was a past grand master of the order in British Columbia.

Opposition For Bracken

May Be Three-Cornered Fight At The Polls

Winnipeg, Manitoba—John Bracken may be two opponents in the deferred election in The Prairies on July 14. A. J. Campbell, Conservative, is to be nominated as a candidate for the seat and the Independent Labor Party agreed to place a man in the booth opposite him. He will elect a member on July 14. H. G. Bradford, government member in the last House, will run as a Bracken follower and probably will be opposed by Col. Arthur Sullivan, Winnipeg lawyer.

Heads National Council Of Women

Ottawa, Ont.—Miss M. Winnifred Kydd, of Montreal, Canadian delegate to the International Council of Women, was re-elected unanimously to the presidency of the National Council of Women at the statutory meeting held here. Mrs. C. R. Townley, Vancouver, was appointed convenor of the national recreation committee.

To Tour Canada

Group Of Empire Farmers On Visit To Dominion

Quebec, Que.—"To see and to learn" might be the motto of the group of empire farmers who arrived here on the liner "Empress of Australia." They spent two days in Quebec prior to starting on a trans-Canada tour.

Thirty-seven in number and including 13 women, members of the party are all closely connected with farming and represent the mother country, South Africa and Irish Free State. They are travelling under auspices of the British National Union, headed by Arthur Canfield, Secretary of the Union and former South Africa Trade Commissioner to Great Britain.

The party is composed of 12 members from all parts of South Africa, 10 from the Irish Free State and 10 from the Dominion of Canada and Scotland. Among them are Daniel Crawford, former treasurer of the National Farmers' Union of England, and M. G. Viljoen, of Cape Province, South Africa, a former candidate of the Nationalist Party.

An Important Judgment

Ottawa Lumbermen Awarded Full Amount Of Claim Against

Toronto, Ont.—In a judgment of far-reaching importance to brokerage houses D. B. Rochester, Ottawa lumberman, is awarded the full amount of his claim, \$162,165.32, against I. W. C. Sollom, Harvey Mills and the Sollom Bros. Lumber Company, by O. E. Lennox, master architect at Osgoode Hall.

Rochester, who dealt with the brokerage firm for many years, represented the defense. The judgment, rendered every year he ever invested with Sollom, Mills and Co. He is also allowed interest at five per cent. from December 19, 1929.

FARM MARKETING BOARD MAY BE APPOINTED SOON

Ottawa, Ont.—A commission to study and report on the feasibility of a farm marketing board will be appointed by the Dominion Government in a few days it was learned here. It is reported that during his recent visit to the west Hon. Robert Weir, Minister of Agriculture, went into the matter and recommended a marketing board.

It is estimated that the commission would begin very soon to study the situation in order to be in a position to discuss the feasibility of a marketing board with exporters from other countries and to make a report to the Imperial Conference. The report of the board would be to avoid surges in prices whenever Canada went on an export basis on such products as butter, bacon and other commodities in which the exportable surplus is small compared with the domestic demand.

It is estimated that the commission will be to avoid surges in prices whenever Canada went on an export basis on such products as butter, bacon and other commodities in which the exportable surplus is small compared with the domestic demand.

The machine was chartered by the Manitoba Chamber of Mines with the result that the ten prospectors can get into the field at a cost of about \$60 each, including equipment.

After months of work, national research council chemists prepared a solution to remove the marring corrosion. The varnish was applied in an attempt to prevent its recurrence.

Local & General

Mr. and Mrs. G. Depuis were Lethbridge visitors Tuesday.

Born—To Mr. and Mrs. Geo. Morris, on July 6th, a daughter.

Albert Wallon of Calgary motored to Champion to visit at the home of Geo. Orr.

Mrs. Tippett and children of Calgary are visiting her sister, Mrs. Geo. Taylor.

Miss Verena James of Lethbridge is the house guest of Miss Ada Williamson.

Mr. and Mrs. J. N. Beaubien left for Edmonton Sunday to attend the W. I. Board meeting.

Miss Jean Cook of Gleichen spent a few days visiting in Champion this week.

Miss Emily Sanderson and Miss Sarah Fanning motored to Lethbridge Tuesday.

Mr. and Mrs. Trusswell of Carmangay were guests of Dr. and Mrs. Freeze on Sunday.

Mr. and Mrs. F. Watts leave this week on their vacation.

Mr. and Mrs. Neil McLeod and Mr. and Mrs. A. Baker were Milo visitors Wednesdays.

J. D. Henderson spent Wednesday in Lethbridge.

Mr. and Mrs. John Cook and Mr. and Mrs. Louis Warren were Nanton visitors this week.

Mr. and Mrs. Geo. Orr visited relatives at Pine Falls last week.

Mr. Earl Boss has accepted a position with the Pioneer Elevator Co. at Mooseleigh.

Miss Anna Caroline Baker was successful in passing her recent music exams held at Lethbridge, with honors.

Miss Aileen McCullough is home, having spent the past year attending school in California.

Mrs. Dobbs of Creston, B. C., sister of Mrs. Dave Scott, is visiting in the Sandersons' district.

Mr. Boulter of the Canadian Bank of Commerce staff of Black Diamond is relieving on the local staff during Mr. Deporter's absence.

Mr. and Mrs. Clarence Davis and Mrs. Miller spent a few days at Great Falls, Montana, taking in the celebration on July 4th.

Mr. and Mrs. C. E. Burke of Champion were guests at the wedding of Miss Neva McKeage and Mr. Ronald Newman at Gladys, Alberta.

The Misses Rachel and Dorothy Crane are spending part of their summer holidays at their father's ranch near Champion.

Mrs. Berger and I. Granlin visited Lethbridge Monday.

Archie Ruggles' Fish Eaters

The fish eaters (Lake McGregor ball team) went fishing in Champion July 1, and there met the Stavely bait takers who never let a fly hit the water.

The fish eaters tried all sorts of flies in all parts of the pond to no avail, there was always a splash on the fish from Stavely would be seen with a contented look on his face and salmon eggs in his mouth.

It is rumored that the fish eaters are going to go to Stavely and try a little fly casting on the rougher waters of the Stavely pond, as they had fisherman's luck in Champion, owing to the rain and the inability to land fish enough to go around, and they are still hungry.

Mr. J. Deporter, who left Tuesday on his vacation, entered the Holy Cross Hospital Tuesday and was operated on for appendicitis on Wednesday morning. Latest reports are that Mr. Deporter is progressing favorably.

Messrs. John and Luke Ohlhofer received the sad news of the death of their brother and sister-in-law, Mr. and Mrs. Ambrose Ohlhofer, of Mt. Carmel, North Dakota. The deaths were caused by eating poisoned breakfast food.

Mr. Lars Hjelle wished to inform the public that his garden was progressing favorably and that he will soon be making his regular visits to Champion and district with vegetables. (Mr. Hjelle's garden did not suffer during the plague of beet worms.)

A party of young folks including Miss Kate Pharis, Miss Wyile, Miss Wallace (Vulcan), Miles Pharis, Bernice Pharis and Leonard Bach spent the week end at Pincher Creek.

Everyone is thinking and talking of holidays these days. While it would appear there will be less travelling to distant points this season, places near or home will be largely patronized.

Welcome visitors on July 1st, were Mr. W. S. Ryan of Warner; Mr. W. Spence of Barons; Mr. C. Thornton of Lethbridge; Mr. Lervatus Nelson of Edmonton, all former residents here.

The youngest son of Mr. and Mrs. James Jordon was kicked on the forehead by a horse Thursday, the wound requiring four stitches.

J. Kulpas and C. Starr Make Fine Plays

Several from Champion took in the celebration at Carmangay Wednesday, in which Champion and Stavely met in a baseball fixture with a result of 12-2 in Champion's favor. Some outstanding playing was displayed in the game. A catch by J. Kulpas, with three on bases, and one down, resulted in a spectacular double play. Another feature was a double steal by Starr and McLaren. Starr advanced to third while McLaren took second.

Crop Report

Varying from the stage of shot blade to fully headed out at heights of more than three feet, the wheat crop in this district has shown quick development with favorable weather and frequent showers during the past week. Oats and barley are good, with early sown fields heading out. These grains are somewhat patchy however, having suffered considerably from insects. Rye growth of grain is a drawn heavily on the moisture supply and the recent rains were very welcome.

The Beet Webworm

Southern Alberta will have to endure the beet webworm for another week to 10 days according to Hod Seaman, Do. minion entomologist.

The damage, says Mr. Seaman, has been greatest in the Carmangay and Champion districts, where gardens have been wiped out in some instances. In the Raymond district sugar beets have suffered heaviest from the infestation.

"There will be another infestation in late August or early September," says the entomologist, "but it is not so likely to be serious."

In the Carmangay and Champion districts the beet webworms have stripped the gardens and in some places have entered the homes, creating a nuisance which householders have had difficulty to remove.

The teaching staff of the Champion Consolidated School will disperse in all directions this year. Miss Cameron goes to Washington to visit relatives, Miss Clarkson will attend summer school at Edmonton, Miss McFall goes to Spokane and will visit her parents there, later taking a position in a telephone exchange, while Mr. and Mrs. Farries and infant son will spend the holidays in Tucson. Mrs. and Mrs. R. L. Baker left Thursday for Calgary, from where Mr. Baker will proceed to Edmonton to assist in reading examination papers.

Lightning struck the barn on L. Granlin's farm on the evening of July 1st, completely destroying the building. The loss included 185 pigs, 20 tons of feed, some grain, a wagon and 14 sets of harness. The barn was covered by insurance.

Women's Institute

The regular meeting of the Women's Institute will be held at the home of Mrs. Cowell on Tuesday afternoon, July 12th. Mrs. F. C. Alcock, convenor of Canadianization and Immigration will give an address, and Mrs. A. W. Jopling will speak on Current Events.

Roll call—Patriotic Quotations. Refreshment convenor—Mrs. D. Watkins.
